

Portugal

- The Teaching Profession as an Enriching Profession:

To develop joint strategies and policy measures to enhance the attractiveness and rejuvenation of the teaching profession, namely by improving regulatory tools that amplify professional stability and by promoting a National Campaign on the Relevance of the Teaching Profession.

- Supporting the Teachers from the Very Beginning:

To jointly reflect on the initial training paths and on the role of the teacher as tutor, namely reinforcing the practical dimension of teachers' initial training and fostering favorable conditions to benefit from the experience of the elder and from the innovation of the youngest.

- The Well Being of Teachers and of Students, two faces of a single coin:

A joint policy making, based on multidisciplinary and technical support, that enhances the school's autonomy and teachers agency as a fundamental condition to pursue teachers' and students' well-being, namely by cutting useless bureaucracy and promoting more efficient and time freeing procedures, enabling teachers to focus on teaching.
